BACKGROUND

Indian Society for Surface Science and Technology (ISSST) organizes scientific seminars, workshops, conferences on surface science and related areas from time to time. Surface Science is a very important field of study and research, and is tremendously useful. This year, ISSST and the Department of Chemistry and Chemical Technology, Vidyasagar University, Midnapore are organizing a one day seminar in Vidyasagar University with the hope that scientists and students will come together on one platform and will be motivated to do research and teaching in the areas of surface science. With this aim in view, and on the basis of the fact that ISSST started organizing such seminars since 2006 under the series' title "Trends in Surface Science and Related Areas (TSSRA)", the present seminar has been arranged on Thursday September 12, 2019.

Probable Speakers:

Dr. Alokmay Datta (SINP, Kolkata)

Prof. Braja Gopal Bag (Vidyasagar University)

Dr. Urmila Saha (Presidency University)

Mr. Kunal Dutta (Vidyasagar University)

Mr. Sourav Das (Jadavpur University)

Mr. Ankita Saha (Jadavpur University)

AIM AND SCOPE

The present conference is a platform to the scientists, technologists, and students to meet, exchange, and share their views, experience, expertise and specialized knowledge in the field of Surface Science and Technology. The interaction among the scientific community, young research students, to senior scientists, and technologists will hopefully identify priority research areas and collaborative research plans. The deliberations are expected to cover various facets of Surface Science that would mainly include the followings: Interfacial Phenomena & Adsorption, Membranes & Bio-mimetics, Excited state & processes, Colloids & Surfaces, Micelles, Emulsions & Microemulsions, Gels & Network materials, Polymers, Supramolecular Assemblies (liposomes & vesicles), Nanomaterials and Nanotechnologies..
